

# Project Proposal: Course Board for Students

김종범, 윤지학, 이재범, 조승현

## 1. Defining the Problem

- a. There is no space for discussing about course with other students.
- b. Most students had used KaKao Talk's Open Chat. However, creating and maintaining Open Chat requires too much efforts of Professor or TAs. So, only few classes have their own open chat.
- c. Reading history of Open Chat is difficult and information is gone away shortly.
- d. Students from other departments are hard to get information about courses.

## 2. Basic Feature

- a. User authentication
  - i. Only students from Seoul National University can register our service.
  - ii. Using our service demands login.
  - iii. Users can logout.
- b. Synchronize course information in mySNU
  - i. Only students who are taking classes can access corresponding board.
  - ii. Board are reset at the end of semester.
- c. Communication interfaces for each class
  - i. Users can write information articles.
  - ii. Users can add comment to articles.

## 3. Additional Feature

- a. Calendar system
  - i. Manage schedules for each class, e.g., submission due, make-up class.
  - ii. Provide a calendar for each class, and students can choose calendars to watch.
- b. Upvote system
  - i. Users can recommend articles to mark it important.
  - ii. Provide a page for most upvoted articles to share helpful resources.
- c. Other useful features can be added.
