Title : KIST safety education.

Late-february, teacher in GSHS(GyeongGi Science High School) told me about KIST intern. So, I applied KIST my resume. I wrote my resume about my informatics Olympiad rewards and my develop programs. I met LeeJangHee in KIST, hold an interview. It was great and I passed KIST intern test(or interview).

If someone comes in KIST first time, he or she must come in KIST safety education. It started 09:00 and ended 17:00. This event was very boring. They told about KIST, the past KIST's incident, and how to solve a problems. At the finish of education, we took a exam about today's education. I guess that I am find.

It started 09:00. As a result, I can't go SNU(Seoul National University)'s lectures. So, I sent a e-mail to my lecture's professors. Some professor gave public absence, but someones didn't give.

Today was very tired to listen the boring education.

Title : President Science Scholarship Interview.

Late-february, I applied president science scholarship. I made my self-introduction about my course, science vision. Also, I wrote science activity papers. I had prepared those documents before I sent those to Korea Scholarship Foundation.

I passed the document screening process. Next, I will have a interview process. Today, in the morning, I went YangJae Subway Station and arrived K-Hotel.

I arrived in 08:30. Because they said they will start in 08:40. But they didn't start the interview and delay some hours. I was very angry. Anyway, interview started. But the interview was not good. The professors asked everything negatively. "Why you didn't do this?", "So, what you do in this process" like this.

After finished interview, I went SNU and take a lectures.
