Title Uncle's house

I visited my uncle's house because they moved to a new house. We were invited to a housewarming party and it was really exciting. Family visit is not the most exciting but we had a great meal and spent much money. I was overwhelmed with the price and eating out takes so much time and energy. Although the quality of the food was delicious I couldn't take the thought of the restaurant food being expensive. I think I'm a pretty economical person.

Title : My father company house.

Last week was special because I went to visit my father down south. My father usually visits us once a week but we went to visit my father this time. It was nostalgic to see many old photos and the pictures of my childhood brought much memories back. However, the travelling distance took so much time and we didn't really have much quality time to spend. Wasting money and time are so draining.
