CoSNU - Course board for SNU students

Team 2 (Jaebeom Lee, Jeehak Yoon, Jongbeom Kim, Seunghyeon Jo)

Department of Computer Science and Engineering, Seoul National University

Introduction

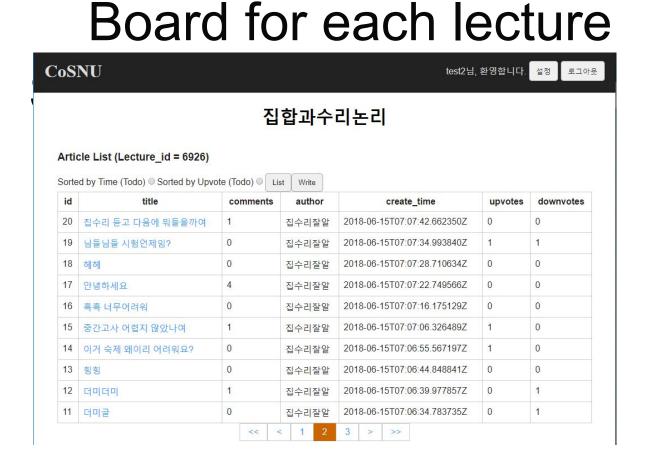

CoSNU is a web service for students from Seoul National University who take the same lecture. Students gather and share various information about lectures. CoSNU provides basic services in the form of a board so that students can easily talk and exchange information about courses. In order to make it easier to get important information, we will also add the upvote system on a per-post basis.

Motivation & Unique Features

Motivation

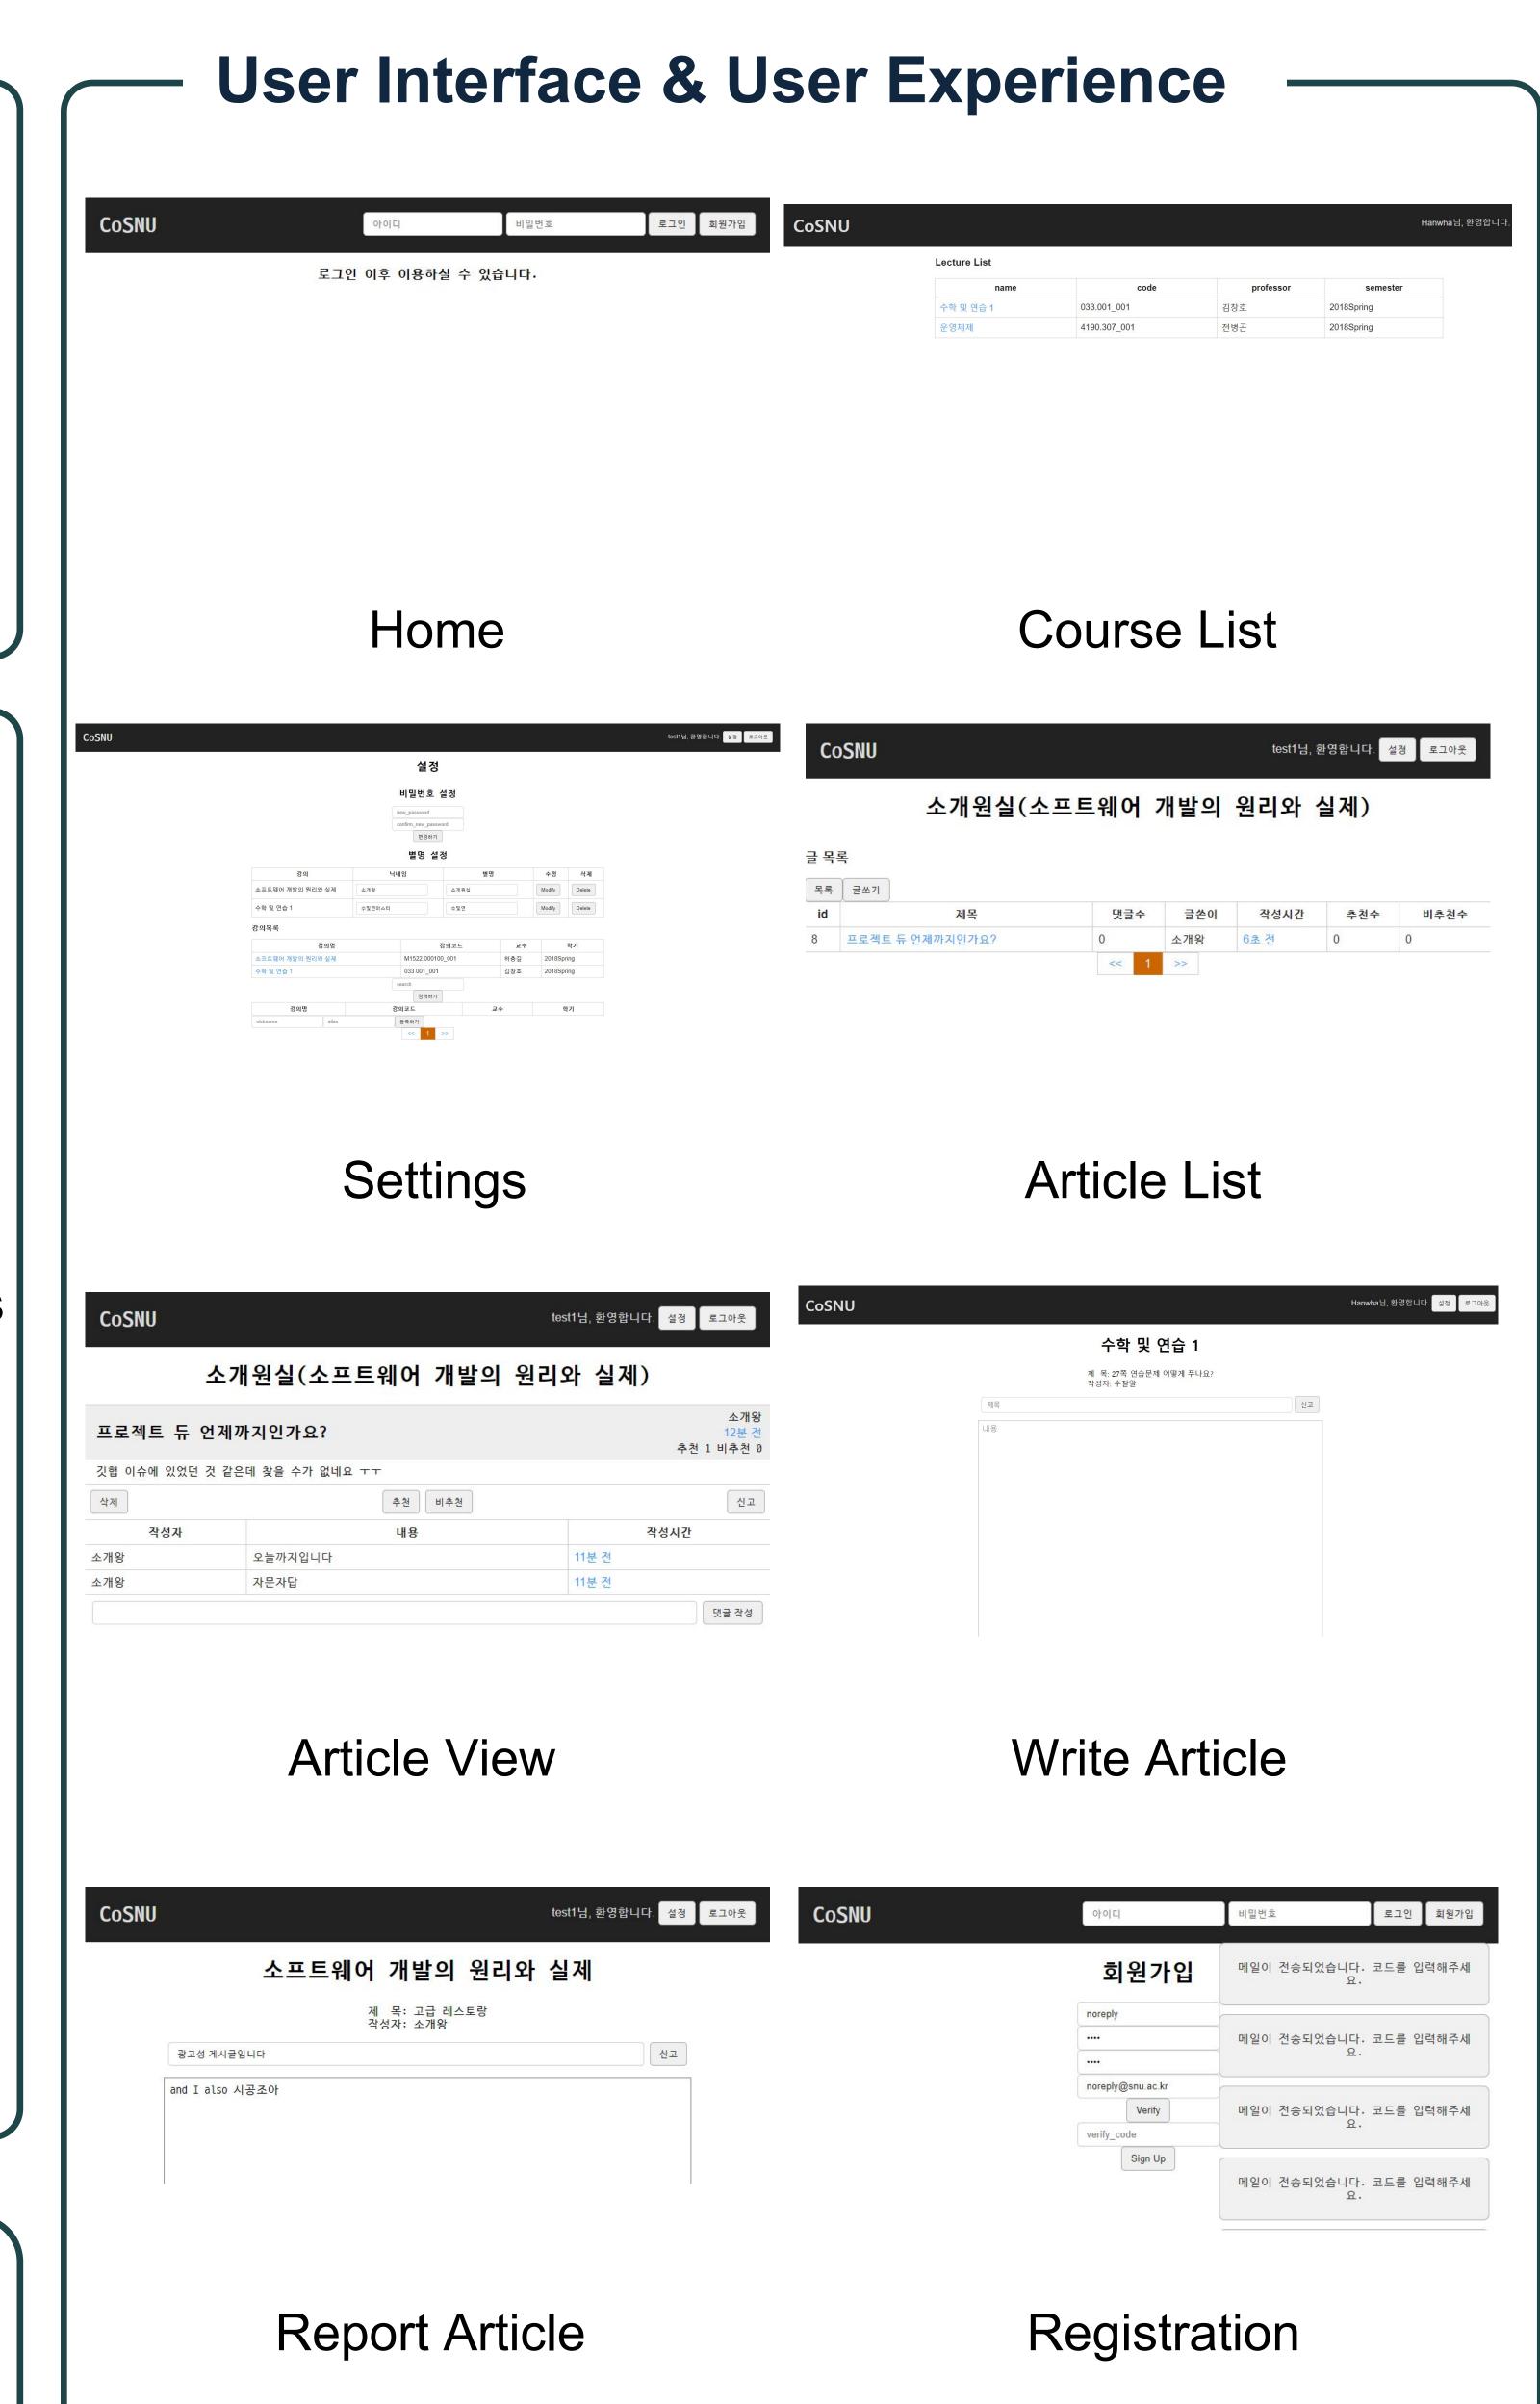

- In most lectures, there is no space for discussing about course with other students.
- For some lecture, there is a KaKao Talk's Open Chat for it. However, creating and maintaining Open Chat requires too much efforts of Professor or TAs. So, only few classes have their own open chat.
- Reading history of Open Chat is difficult and information is gone away shortly.
- Students from other departments are hard to get information about courses.

Unique features

System Design & Architecture Backend **Frontend** Comment Username User Author Confirm Password Nickname Content SNU Email CreateTime Article Upvotes Lecture 2 Sign Up Downvotes Lecture Lecture 3 Lecture name Lecture number Professor Semester Sorted By Time **Article** Sorted By Upvote Confirm New Password Author CreateTime Reporter Reportee Nickname 2 Downvotes Content Lecture 3 Lecture List search Lecture Backend Django Rest Framework Report Write/Modify Article New Comment Frontend Write/Modify {title} React & Redux-saga Send

Future work

Calendar

- help manage important schedules like submission due or make-up class
- provide a calendar for each course, and students can choose calendars to watch

•mini-talk system

- one-to-one or many people
- can talk even if they don't take same lecture
- make our service more general; not for only lectures, talk about general school life.
